

WIND SIFTER

METHOR CARRIER

- Arrangement of the wind sifter above the drop parabola reliably discharges 2-D light materials
- Methor doses the material feed and at the same time protects the wind sifter from impurities
- Adjustment of suction power, angle and distance allows respond to different material requirements
- Attachment is picked up with the adapter of the Methor and powered by the auxiliary hydraulics
- Integrated support legs allow rapid set down and change to another attachment within minutes without additional equipment
- No support is required in operation, so the machine can be moved during work
